

AIR QUALITY CONTROLLER

RQA 410

APPLICATION

Controls the percentage of outside air entering the premises in relation to the quality of air monitored by one or more SQC 954 sensors. Controls, with a progressive 0 ... 10 V DC signal, the outside air damper and/or, by means of a relay, the switching on or increased speed of a fan.

Supplied with potentiometers for minimum % outside air and air quality set point.

THE UNIT CANNOT BE USED FOR SAFETY SYSTEMS.

Essential detectors: 1 or more room air duct air quality detectors.

Features

- Power supply: 24 V~; Consumption: 5 VA; Wall-mounting case 130 x 80 x 35; Protection: IP 30.
- 2 setting potentiometers:
 - Minimum opening % outside air;
 - Air quality value requested.
