

SWC701 v0.99.2619

CHANGES AND IMPROVEMENTS

Subject

Notes

SWC701 - Controllers

For these controllers: MRL608, MRL608C1, UCI328, UCO638, UPM678, XCO428 e XPT678, during an 'automatic send' phase, a problem about not data sending of some data buffers, rightly saved on the database, has been solved. Furthermore a wrong display of changes saved on a 'historic sent' file of type 'Send to Historic sent file' has been solved.

SWC701 - General

A problem of wrong display of the day of week, happened on the main page and on some printings, has been solved.

SWC701 - User management

The management of user access level 'Synoptics only' has been improved.

SWC701 - Synoptics

The display of synoptics has been improved avoiding an annoying flickering during loading or upgrading of the objects.

SWC701 - Historic files

Some messages have been improved to warn better and prevent wrong user choices during a 'send all data' or a send of only changed data starting from a historic file.
